Full Stack Software Developer

Profile

Full stack developer with a 16-year background in IT infrastructure and technical project delivery. Since 2021, has built and shipped production web applications (React, Node.js, PostgreSQL) for Scottish community organisations as the sole developer, owning the full lifecycle from requirements gathering to deployment and support. Brings hands-on Azure, Docker and networking and security experience (CCNA, PDA in Cyber Resilience), plus a track record of managing stakeholders and vendors. Currently completing a BSc in Software Engineering at the University of Glasgow.

Technical Skills

Used in production: JavaScript (ES6+), React, Node.js, PostgreSQL, REST APIs, Authentication & Authorization, Responsive Design, Git/GitHub, Docker, Azure, AWS, Dokploy, Agile/Scrum, Jira, Trello

Also familiar with: TypeScript, Express, Python, MongoDB, Firebase, SQL Server, CI/CD, Linux

Software Development Experience

Lead Software Developer (sole developer) | Castlemilk Pantry, Glasgow | *Mar 2023 – present*

React · Node.js · PostgreSQL · SMS API

- Led end-to-end delivery of a membership management platform as the only developer, gathering requirements from non-technical stakeholders and iterating on user feedback.
- Replaced manual weekly Excel tracking with a custom system managing 350+ members, including automated check-ins and expiry alerts.
- Automated quarterly funder reporting that previously took a full working day each week.
- Built a QR code scanning system and automated SMS notifications for member communication.

Full Stack Developer | Auldhouse Community Church, Glasgow | *Jun 2023 – present*

React · Docker · Azure · Dokploy

- Delivered a custom application that reduced service queues by 50% and increased capacity to support the community.
- Replaced paper-based processing with instant digital verification, removing hours of manual off-site data entry.
- Migrated the application from AWS/Heroku to a self-managed Azure VPS using Docker and Dokploy, cutting hosting costs by 70%.

Software Engineer | Bikes for Refugees (graduate project), Glasgow | *2021 – 2022*

React · AWS · Heroku

- Designed and delivered a full web app booking platform using Scrum, cutting daily admin workload by 30%.

IT Volunteer | Govan Community Project, Glasgow | *2019 – 2021*

- Provided hands-on IT support and digital literacy training to reduce the digital divide in Glasgow.

Previous Career: IT Infrastructure & Management | *2003 – 2019*

IT experience since 2003, spanning technical support and VoIP telecoms (Fusion, Intertel, Konffetty) and IT Manager and Administrator roles across El Salvador and Guatemala (Red Fox Las Mercedes, JOR S.A. de C.V., ANRA S.A. de C.V.), leading infrastructure projects, vendor negotiations and cross-functional teams.

- Delivered a biometric payroll system for 1,500 employees from design to go-live.
- Built a hybrid cloud server infrastructure on Azure for an enterprise ERP application.
- Led a migration to VMware virtualisation across multiple international facilities.

Education & Certifications

- BSc Software Engineering, University of Glasgow (expected 2029)
- PDA in Cyber Resilience (SCQF Level 7), Glasgow Clyde College, 2025
- AI Essentials Track, CodeYourFuture and Google.org AI Opportunity Fund, 2025
- Full Stack Web Developer Certificate, CodeYourFuture, 2021 – 2022
- BEng Telecommunications Engineering, University Francisco Gavidia, 2004 – 2008
- CCNA, Palo Alto Networks and Fortinet NSE 1–3, 2003, 2015.
