IT Infrastructure & Project Delivery Manager

Profile

IT infrastructure and project delivery manager with 16+ years of experience leading networking, cloud and ERP programmes across multi-site, multi-country environments. Proven track record managing vendors, budgets and cross-functional teams from requirements to go-live, including a 1,500-employee biometric payroll rollout and hybrid cloud deployments. CCNA, Palo Alto and Fortinet NSE certified, with hands-on VMware and Azure experience. Since 2021, has also designed and delivered production web applications for Scottish community organisations.

Core Skills

Project & Delivery: Requirements Gathering, Stakeholder Management, Vendor Negotiation, Budgeting, MS Project, Jira, Trello, Agile/Scrum

Networking & Security: CCNA-level networking, Palo Alto, Fortinet NSE 1–3, LAN/Wi-Fi policy and optimisation

Infrastructure & Cloud: VMware vSphere, Azure, Hybrid Cloud, Docker

Systems & Development: SAP ERP evaluation and negotiation, Business Systems Analysis, React, Node.js, PostgreSQL

Experience

Full Stack Developer | Castlemilk Pantry and Auldhouse Community Church, Glasgow | *2021 – present*

- Design, build and deploy production web applications (React, Node.js, PostgreSQL) on Azure and Docker as the sole developer for community organisations in Glasgow.
- Work directly with non-technical stakeholders to gather requirements and deliver end to end, including a 350+ member management platform and an app that cut service queues by 50%.
- Apply an infrastructure and security background to hosting, deployment and data handling.

Information Technology Manager | ANRA S.A. de C.V., El Salvador | *2018 – 2019*

- Managed delivery of IT maintenance programmes across 8 regional facilities, coordinating suppliers, timelines and operational stakeholders to keep services running.
- Led SAP ERP vendor evaluation and negotiation from first assessment to contract agreement, working with senior stakeholders across departments.

Information Technology Administrator | JOR S.A. de C.V., El Salvador | *2016 – 2018*

- Planned and delivered a hybrid cloud server infrastructure on Azure to support an enterprise ERP application, managing scope, vendors and implementation end to end.
- Reviewed and enforced LAN and Wi-Fi policies, improving connectivity, security and performance.

Information Technology Manager | Red Fox Las Mercedes, El Salvador and Guatemala | *2009 – 2016*

- Directed IT transformation projects across two countries, managing cross-functional teams, budgets and international vendors over seven years.
- Delivered a biometric payroll and management system for 1,500 employees, from design to go-live, coordinating technical teams, stakeholders and suppliers.
- Led migration to VMware virtualisation and standardised hardware across multiple international facilities.

Technical Support Manager | Fusion S.A. de C.V., El Salvador | *2008 – 2009*

- Administered VoIP and domain servers and ran the server and internet risk mitigation plan, supporting and training sales staff and customers on VoIP devices.
- Standardised telephony services with international carriers (AT&T, XO, Verizon), deployed local Asterisk servers for inbound call links, and trained new VoIP support technicians.

Technical Support Officer | Intertel S.A. de C.V., El Salvador | *2006 – 2007*

- Installed, configured and maintained VoIP equipment, trained sales staff and customers, and handled client site visits, billing and equipment inventory.
- Built an Access 2003 application to track clients, billing and services.

IT Assistant | Konffetty S.A. de C.V., El Salvador | *2003 – 2006*

- Provided preventive and corrective support for 35+ computers and 40 users, plus data networks, cabling, the antivirus server and UPS control.
- Migrated a Samba Linux server to Windows NT.
